Chapter 2: Ping Your Social Bookmarks

After you have created your account and bookmarked your website, the final step is to ping your bookmark. Pinging basically tells the search engines that something new is available.

From our example in chapter 1, the account we created at delicious.com gave us 10 new pages:

- the profile page at <http://delicious.com/johnbilljb>
- the profile's RSS page at <http://feeds.delicious.com/v2/rss/johnbilljb>

- the 4 tag pages at
 - <http://delicious.com/johnbilljb/domain>
 - <http://delicious.com/johnbilljb/registration>
 - <http://delicious.com/johnbilljb/cheap>
 - <http://delicious.com/johnbilljb/renewal>

- the 4 tag RSS pages at
 - <http://feeds.delicious.com/v2/rss/johnbilljb/domain>
 - <http://feeds.delicious.com/v2/rss/johnbilljb/registration>
 - <http://feeds.delicious.com/v2/rss/johnbilljb/cheap>
 - <http://feeds.delicious.com/v2/rss/johnbilljb/renewal>

The fastest way is to ping the main profile page: <http://delicious.com/johnbilljb>

The spiders will automatically detect the RSS feed of that page and crawl the links found.

Pinging is very simple.

STEP 1

Go to www.pingomatic.com

STEP 2

Enter the details as required.

STEP 3

Tick the boxes in 'Services to ping' and click the button 'Send Pings'

Chapter 3: Improper Use Of Social Bookmarking

Many users got greedy and started bookmarking aggressively at these social bookmarking sites. Social bookmarking sites are now stricter with the links that appear on their sites. They are also on the lookout for 'Self Promoters'.

As we know, if we bookmark our own sites aggressively, we are labeled as 'Self Promoters'. Some social bookmarking sites are fine with it but others will simply delete your bookmarking account.

How does a 'Self Promoter' bookmarking account looks like?

- 1) It contain links to similar looking sites. For example: Adsense blogs and Ebay affiliate stores.
- 2) It contain links to the same domain name. For example:
 - dogtrainingpowercourse.com/cheap-dog-training/
 - dogtrainingpowercourse.com/buy-good-dogs/
 - dogtrainingpowercourse.com/discipline-your-dog/
 - dogtrainingpowercourse.com/dog-training/
 - dogtrainingpowercourse.com/new-age-training/

The following shows how an account with all links pointing to the same domain name looks like. When someone complains about this bookmarking account, it will most likely get visual inspected and banned from the social bookmarking site.

The screenshot shows a social bookmarking profile for 'johnbilljb'. The profile has a search bar and a 'Bookmarks' count of 7. The bookmarks are sorted by 'Most Recent'. The list includes:

- Buy old domains** (09 SEP 08): You can buy old domains with authority in the search engines from our marketplace. You can also sell your domain here for a profit. Visit our marketplace and shop for the best domain names. Tags: old, domains, marketplace.

Chapter 4: Bookmarking Camouflage

Before we move on, take a look at your browser's bookmarks. You will find many different bookmarks to totally different sites. **This is how a bookmarking account should look like.**

Therefore your online bookmarking account should look similar. The proper way to bookmark your own URL is to camouflage it. You have to hide it among links not related to your site. For every URL that you intend to bookmark, you might want to add three to five other unrelated bookmarks.

These are some common things that most people love to bookmark:

- interesting videos.
- latest celebrity gossips.
- sports results.
- the latest world news.
- any other interesting sites that you can think of.

This is how a camouflage bookmarking account looks like. As you can see the two links that I intend to promote are hidden among many other links. This account will definitely pass a visual inspection.

The screenshot shows a bookmarking interface for a user named 'johnbilljb'. The interface includes a search bar, a 'Bookmarks' count of 8, and a 'Sorted by Most Recent' dropdown. The list of bookmarks is as follows:

Chapter 5: Benefits Of Social Bookmarking

Social bookmarking is one of the easiest ways to get your site indexed in the search engines. The main benefit of social bookmarking is getting free traffic from the search engines. With social bookmarking, you can easily rank for long tail keywords in the search engines.

Common Question:

I heard that Social Bookmarking is no longer effective? Is it true?

Answer:

I never believed in what the so call 'gurus' said.

- the 'gurus' said blog and ping is no longer effective.
- the 'gurus' said article submission is no longer effective.
- the 'gurus' said you cannot have duplicate content.
- the 'gurus' said you cannot have too many links.
- the 'gurus' said

Stop listening to what people said and **TEST IT YOURSELF**. Most of us are not willing to test new methods because we like to be told what is working and what is not.

- we are too lazy to test.
- we are afraid of failure (losing money).

Because of the fear of failure, we like to take the easy way out by believing what the 'gurus' have said. The 'gurus' made their money by exploiting our weaknesses.

Chapter 6: Problem With Bookmarking Software/Script

The main problem with social bookmarking is that it is time consuming. You have to manually create your bookmarking accounts and then bookmark your websites. If you want to bookmark to hundreds of social bookmarking sites, you will spend hours just to bookmark one URL.

To automate the bookmarking process, many social bookmarking software and scripts are being created. Many of them are way overpriced. Some of these tools have ridiculous monthly fees.

Most of them are spamming tools developed to destroy the Social Bookmarking sites. These spamming tools randomly generate account name and passwords at these Social Bookmarking sites and post hundreds of links at a single go.

One major problem with these tools is that they leave footprints with their duplicate content issue. Imagine creating accounts at 100 social bookmarking sites with the same login name. Your login name can be easily tracked down and you might be accused of spamming.

When you bookmark an URL across all those accounts, the same title, tags and description will appear at all 100 social bookmarking sites. This can be an issue of duplicate content and the search engines will discount all your bookmarking links.

A good social bookmarking software **MUST** have the following features:

- 1) Able to randomize the bookmark's title, description and tags.
- 2) Able to add your own Scuttle, ScuttlePlus, Pligg and PHPDug sites.
- 3) Able to camouflage your bookmarks with other links.
- 4) Able to create bookmarking accounts with different usernames.
- 5) Able to ping your bookmarks.
- 6) Able to schedule your bookmarks at different time.
- 7) Able to verify your email.
- 8) Able to use multi-threading for faster bookmarking.

There is only one tool in the market today with all the above main features.
